MISSION STATEMENT

The mission of the Metropolitan Police Department, City of St. Louis is to protect, serve and assist citizens when conditions arise that may affect the well being of the individual or the community. Cooperating with others in the community, officers will work to prevent and detect crime, protect life and property and achieve a peaceful society, free from the fear of crime and disorder. Members of the Department will strive continually for excellence and maintain the peace through service, integrity, leadership and fair treatment to all.

LAW ENFORCEMENT CODE OF ETHICS

As a law enforcement officer, my fundamental duty is to serve the community; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation and the peaceful against violence or disorder; and to respect the constitutional rights of all to liberty, equality and justice.

I will keep my private life unsullied as an example to all and will behave in a manner that does not bring discredit to me or to my agency. I will maintain courageous calm in the face of danger, scorn or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed both in my personal and official life, I will be exemplary in obeying the law and the regulations of my department. Whatever I see or hear of a confidential nature that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.

I will never act officiously or permit personal feelings, prejudices, political beliefs, aspirations, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.

I recognize the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of police service. I will never engage in acts of corruption or bribery nor will I condone such acts by other police officers. I will cooperate with all legally authorized agencies and their representatives in the pursuit of justice.

I know that I alone am responsible for my own standard of professional performance and will take every reasonable opportunity to enhance and improve my level of knowledge and competence.

I will constantly strive to achieve these objectives and ideals, dedicating myself to my chosen profession...law enforcement.

Core Values

SERVICE | INTEGRITY | LEADERSHIP | FAIR TREATMENT TO ALL

MESSAGE FROM MAYOR

To the St. Louis Community:

Safe communities are strong communities. The safety of St. Louis residents and visitors is my top priority. The City's holistic approach to reducing crime focuses strategies on Prevention, Intervention, Enforcement, and Reentry (or PIER, for short). The PIER Plan is a robust list of practices, programs, and plans that we have begun implementing to build a safer and more sustainable City for people to live, work, explore and play.

Our officers play a central role in our efforts. I am very proud of the tenacious work the men and women of our Department do for our City morning, noon and night, day in and day out. Because of it, we have seen a significant decrease in crime over the past decade.

Building and maintaining trust between the community and law enforcement is an essential part of reducing crime and creating stronger neighborhoods. Our SLMPD continues to make significant progress toward that goal, while increasing the use of technology in crime reduction operations. From license plate readers and the Real Time Crime Center to additional foot, bike and mounted patrols, the Department is diligently working to enhance safety while bolstering community engagement. Part of those efforts include putting more officers in areas that need their attention the most, followed by other City services, like boarding up vacant buildings, removing excess refuse and debris, and ensuring that all street lights are in working order to help address quality of life issues in our neighborhoods.

My Administration also is dedicated to ensuring that our officers receive the support, training and resources they need to do their jobs safely and effectively. That includes employing new technology, along with crisis intervention and civil disobedience training.

You will learn about these efforts and more inside the SLMPD's 2015 Annual Report, which not only highlights the Department's progress and initiatives but also increases transparency and communication with the people the SLMPD serves. After all, it takes all of us working together to create a safer City for everyone.

Sincerely,

A handwritten signature in cursive script that reads "Francis S. Lay".

MESSAGE FROM POLICE COMMISSIONER

Dear Citizens:

If I had to summarize the significance of 2015 for the St. Louis Metropolitan Police Department in just two words: building foundations.

This was the common theme in our major actions and initiatives last year. When we looked into the future with the Final Report of President Barack Obama's Task Force on 21st Century Policing, we not only saw what our agency needs to accomplish in that future, but the direction of the entire law enforcement profession.

In some cases, the future meant integrating new technology, and in others, developing new organizational structures. It meant making changes to our institutional culture which is the underlying fabric of our DNA and it meant forging new networks in the community.

All these different measures are aimed at the same overarching goal: to give St. Louis a police department that does not merely follow the latest trends or reach for the highest standards of professional law enforcement, but emerges as a leader in all aspects.

One key example of that leadership is the creation of the Real Time Crime Center (RTCC). This remarkable asset is now hitting its stride, and in the process, changing the way we do business. It allows best practices to guide intelligence-led policing, and uses technology to drive the rapid gathering, analyzing and immediate sharing of critical information. Integrating technology into the daily lives of officers is making them more efficient and our city safer.

Another technological leap forward, and one with profound implications for all aspects of modern policing, is our embrace of camera applications. This includes high-visibility cameras and a pilot body-worn camera program designed to record interactions between citizens and police. These resources drive us ahead in our pursuit both of greater efficiency and of greater transparency.

As exciting as these steps are, they cannot match the importance of one project that is integral in building lasting relationships in the community: community engagement and outreach initiatives. The commitment of resources shows just how serious we are about building public partnerships, earning public trust and changing the culture of law enforcement to serve those vital ends.

These initiatives fit together as part of a long-term vision. My ultimate goal is one of continuous improvement in our level of service to the citizens of St. Louis, and ensuring the safety of the men and women of this department. In the 2015 Annual Report to the Community, you can read about the initiatives and accomplishments that make up the foundation for our future.

Very truly yours,

LEADERSHIP

SLMPD Implements Body-Worn Camera Pilot Program

In spring of 2014, the St. Louis Metropolitan Police Department began the process of evaluating the need and the feasibility of implementing a Body-Worn Camera (BWC) program. Shortly after the department began the process of collecting preliminary information on the topic, a significant event occurred merely eight miles outside of the City of St. Louis; the officer-involved shooting of Michael Brown. The reverberations of that event, and the weeks that followed, were felt by communities and police agencies across the country, and most notably in the St. Louis region. The changes to policing in the coming months and years would be profound.

One notable change was the increased emphasis on creating trust and transparency between law enforcement agencies and the communities they serve. While our department has always valued the idea of transparency, many law enforcement agencies are not as open and accessible. Body-worn cameras soon became a widespread topic of discussion and just one solution to the growing issue of distrust between police officers and citizens. The thought was if the community is able to see what an officer sees, there will be some understanding of the decision-making process during police and public interactions.

Our agency understood the importance of executing a body-worn camera program for our officers. In the weeks and months following the events in Ferguson, agencies including the International Association of Chiefs of Police (IACP), the Department of Justice (DOJ) and many others released recommendations for the formation of BWC policies. Our department also consulted with more than twenty other law enforcement agencies in the development of a policy.

The department began a BWC pilot program after months of planning and development in December of 2015. The goals of the pilot program were to assess the technology, assess the needs of the Department to fully implement a BWC program and to gauge public and officer opinion on the use of the technology.

The pilot program was designed to last 90 days. Selected sergeants were outfitted with either a chest mounted or eye-glass mounted camera, all of which were provided by TASER at no cost to the department. Prior to beginning the program, all participating sergeants were provided training on the policy, the operation of the camera technology and were taught how to manage evidence generated from the cameras.

The department completed the pilot program in March of 2016. Participating sergeants provided their feedback. The department also launched a survey on its website to encourage citizens to leave feedback and share their concerns. The department found that both sergeants and the community had very similar concerns.

Many shared concerns relative to privacy. If an agency deploys BWCs, the agency creates a reasonable expectation that the videos will be made available to the news media and the public. For example, if an officer responds to a domestic disturbance, should a neighbor have the right to request the BWC video? Other concerns centered on officer safety. Will officers be first thinking of turning on the camera before worrying about defending themselves or the victim of a crime? Internally, the department also has concerns about cost of storage. It is clear that the costs of purchasing cameras are relatively small compared to the monthly costs of maintaining and managing the video recordings.

There were also many positive comments; most focusing on the benefit of having a video that closely captures the officer's point of view when responding to the scene of an incident. Other agencies have seen BWCs as an effective tool in reducing the amount of officer misconduct. According to a 2012 study of the Rialto Police Department in California, use of force incidents declined by 60 percent across the entire department after the implementation of a BWC program. Perhaps most impressively, the Rialto Police Department saw an 88 percent decrease in complaints compared to the year prior to BWC deployment. Similar effects have been seen in jurisdictions across the country.

Though increasingly more police departments throughout the United States are beginning to make use of BWCs, no consensus has emerged regarding best practices for program administration. Throughout 2016, the department will work to compile an in-depth analysis and review of the pilot program and continue to take steps towards outfitting our officers with body-cameras.

The Real Time Crime Center Opens Its Doors in Police Headquarters

In the 21st century, technology and data have become two of the most critical tools for law enforcement agencies around the world. Since Chief Sam Dotson was named Police Chief in 2013, there has been a new focus on improving technology with the goal of providing real time information to officers in the field.

In May of 2015, the SLMPD's Real Time Crime Center (RTCC) was unveiled at Police Headquarters. The RTCC is manned with commissioned police officers 24 hours a day and 365 days a year who provide both analytical and investigative support to officers and detectives throughout the department. The RTCC serves as the St. Louis Fusion Center on nights and weekends to ensure calls are answered and information is acted on immediately and without delay. The RTCC keeps the SLMPD's command staff and civilian support apprised of pertinent events 24 hours a day.

The RTCC was designed as a public/private partnership by federating privately owned surveillance cameras into the center. The federation of privately owned cameras is more fiscally responsible for the City of St. Louis and serves as a force multiplier to increase the number of cameras available to the SLMPD.

The detectives assigned to the RTCC gather and disseminate information from disparate databases with a focus on monitoring, deterring and evaluating criminal activity in real-time through the use of surveillance cameras, fixed and mobile license plate recognition (LPR) systems, crime analysis and other

law enforcement software and databases such as ShotSpotter. The center provides investigative support to the first responders in the field, as well as to the detectives handling the follow-up investigations. The RTCC is focused on improving SLMPD's situational awareness with the #1 goal of increasing the safety of all SLMPD Police Officers, the citizens who reside in the St. Louis Region, and visitors to our area.

This state of the art center provides the SLMPD technologically advanced tools to help address crime and to make our community safer. The RTCC deploys highly visible surveillance pan-tilt-zoom surveillance cameras throughout the city that are easily detectable to serve as a deterrent for criminal activity. The cameras are clearly marked with the SLMPD logo and flashing LED lights to make their presence known to individuals in the area. These surveillance cameras feed into the RTCC and are available to live stream 24 hours a day. The highly visible cameras are also deployed during special events in St. Louis such as Fair St. Louis, Mardi Gras, parades, marathons, and other events in which there are large groups of people gathered together.

The RTCC uses Genetec for its IP video management system for both surveillance cameras and the fixed license plate reader (LPR) program. This robust video management system has helped the RTCC quickly expand its surveillance camera project by federating cameras owned and maintained by the private sector.

The fixed LPR program was initiated after the opening of the RTCC and has proven to be a valuable tool for addressing crime in the City of St. Louis. Before the RTCC, only mobile LPRs were used by the department. There are 10 SLMPD police vehicles equipped with mobile LPRs that travel throughout the city locating vehicles wanted for serious felony crimes such as robbery, assault, or stolen vehicles.

Working with neighborhood groups and private partners, the SLMPD now has access to over a dozen fixed LPRs that were strategically placed at busy intersections in various neighborhoods in the city. Detectives in the RTCC receive the LPR hits on vehicles wanted for criminal activity and are quickly able to obtain information about the case providing officers in the field the location, vehicle description and identifiers, and other relevant information needed to safely affect arrests.

Since its inception, the RTCC has proven itself as a valuable and necessary resource by continually providing information to officers on the street in a way that is both clear and actionable. In only its first 17 months of operation, information provided by the RTCC has led to over 150 arrests, involving over 400 separate charges, and the recovery of over 64 stolen vehicles and 16 illegal firearms.

The unique design of the SLMPD's Real Time Crime Center earned it honors as the recipient of the International Association of Law Enforcement Planners (IALEP) 2015 Phil E. Keith Project of the Year Award.

SLMPD Launches Community Engagement Organizational Development Division

Photo by Robert Cohen, Post-Dispatch

In April 2015, the Department announced the formation of the Community Engagement and Organizational Development Division (CEODD), an office focused on strengthening relationships between the department and the citizens we serve. The CEODD was formed to meet the needs of policing in the 21st century and to ensure equal and respectful treatment while providing the highest quality of service to citizens.

Through various community outreach programs and strategies, the CEODD's overall mission is to build, strengthen and sustain trusting relationships and partnerships within the 79 diverse neighborhoods that comprise the City of St. Louis. Along with implementing community outreach programs, the CEODD focuses on organizational development and internal training. Training programs focused on ethics, de-escalation tactics and implicit biases will provide officers with the tools necessary to better serve and communicate with citizens.

The CEODD manages several programs that all work to maintain and enhance relationships between the officers within our department and the community they serve. For example, the Police Athletic League (PAL), a volunteer based program, provides area children with positive encounters with police officers through sports and activities. Currently, there are more than 700 area children ages 5-18 involved in PAL activities. There is no cost for children to participate in PAL activities. All equipment, uniforms, league fee, registration and insurance are paid by PAL. The Police Explorers program also offers an excellent op-

portunity for teens and young adults ages 14-20 to build relationships with officers and learn more about a career in law enforcement. Police Explorers have the opportunity to gain practical experiences while also serving the community. The Explorers program strives for participants to become better citizens and community members while promoting high standards of scholarship, character development and physical fitness.

Another successful program managed by the CEODD is the St. Louis Citizens Academy. The Citizens Academy offers an insider's view into the day-to-day job of a St. Louis City Police Officer and is designed to further strengthen the bond between the department and the community. The Citizens Academy meets one night per week for 12 weeks. Actual police officers teach nearly all of the classes which include sessions on the department's history and structure, crime patterns, gang intelligence, homicide investigations and community policing techniques among other things. In addition to classroom instruction, participants also visit with police canines, interact with the department's bomb and arson robot, tour the 911 center and even use driving and shooting simulators. At the end of the course, a graduation ceremony is held to honor those who have completed the course.

On August 6, 2015, the CEODD hosted its first Coffee With A Cop event. The Coffee With A Cop program was launched by the Hawthorne Police Department in Los Angeles, CA in 2011. The program was designed to improve trust and build strong relationships between police and the community. Since its inception, Coffee With A Cop events have been hosted across the United States, and in Canada, Nigeria and Australia. The Metropolitan Police Department holds its event once a month at various locations throughout the City of St. Louis. During the events, officers invite citizens to join them for coffee and conversation. There is no agenda and no speeches; just a chance for residents to ask questions, voice their concerns and get to know the officers. The program has been successful in allowing our department to build relationships with the citizens we serve...one coffee cup at a time!

In addition to the various community outreach initiatives managed by the CEODD, the division also oversees the department's CrimeStoppers program and the MetroLink Unit.

homicide

HOMICIDE
PRESENTATION
2015

ST. LOUIS, MISSOURI

Executive Summary - Homicides

Homicide Count:

- 2015 Homicide Total - 188 (increase of 30, or 18% from 2014)

Homicide Demographics:

- 85% of the victims were Male.
- 92% of the victims were African-American.
- 59% of homicide victims were aged 19 - 32.
- 45% of homicide victims were African-American males between the ages of 17 and 28.
- 172 (91%) of victim had a criminal history (vs. 90% in 2014).

Geographic Areas Affected

- 34% of homicides occurred in District 6. 26% of homicides occurred in District 5.
- 79% of homicides occurred in half of the city's 6 districts.

Top Homicide Circumstances:

- Unknown - 58.88% (54.72% in 2014)
- Argument/Fight - 13% (19% in 2014)
- Retaliation - 9.14% (5.03% in 2014)
- Robbery - 8.63% (6.29% in 2014)

Typical Homicide Summary

- Homicide Victim & Suspect
 - Male
 - African-American
 - 17 - 29 years of age
 - has a criminal history

Counting Homicides: Temporal Analysis

	2014	2015	% Change
January	14	16	14%
February	5	8	60%
March	15	10	-33%
April	10	20	100%
May	9	15	67%

July	13	20	54%
August	15	23	53%
September	15	16	7%
October	20	15	-25%
November	18	12	-33%
December	21	7	-67%
Grand Total	160	185	16%

Counting Homicides:

The F.B.I. Uniform Crime Reporting Program (UCR) establishes all guidelines and procedures for the submission of crime data to the State UCR Program Coordinator (State Police). Murders are counted at the time that Homicide Investigators have determined that, after investigation, an intentional killing of a human being by another has occurred.

Clearances of murders occur when at least one person suspected of committing the murder is taken into police custody for prosecution. Clearance is counted by the month that the suspect is taken into custody. While the official homicide statistics, shown in the table on this page, counts homicides by the date they were coded (for example, if a person is fatally injured in one year, but succumbs to their injury in the following year, the homicide is officially counted in the year of death, and not the year of injury), the remainder of statistics in this report will not reflect those numbers, but rather only reflect those murders that *occurred* within that calendar year.

It is important to understand that UCR allows adjustments (e.g. clearances, reclassification, unfounded, etc.) from previous submitted months to be made the month that the adjustment becomes known to police.

Homicides by Month: 2011 - 2015

Counting Homicides: Temporal Analysis

RECAP

- The graphs above show the monthly, and annual, City of St. Louis homicide numbers since 2011.
- Crime victims may succumb to their injuries months or years after the incident data. These figures include those victims who were injured in one year and died in another.
- While many crimes show seasonal changes, in the City of St. Louis, it does not appear that seasonality has direct effects on homicide.
- While we are able to look at homicides by both the date the offender was arrested, regardless of when the homicide occurred (Month Coded), and by the date the homicide occurred, regardless of when the arrest was effected (Date of Occurrence) the official statistics, per UCR rules, are the Month Coded numbers.

Counting Homicides: Temporal Analysis

RECAP

- No day was consistently the highest or lowest. Thursday was a high day this year, but low last year.
- While there was no sharp difference in day of week, there is a clear pattern when it comes to time of day, with the period between 9 pm and 3 am being the most likely hours for a homicide to occur, totaling 51% of this previous year's homicide.

The Geography of Homicide

RECAP

- The Map is an illustration of the locations where homicides have occurred within the City of St. Louis over the previous two years.
- As the map clearly illustrates, homicides within the City of St. Louis cluster to the Northern half of the city, and just West of I-55 and South of I-44 in South St. Louis.

The Geography of Homicide

RECAP

- The number of homicides per District remains fairly consistent from year to year within each District, with the notable exception of the rise in the 6th for 2015.

Weapon Analysis

	2015	2014	% Change
FIREARM	179	138	30%
OTHER	4	8	-50%
BLADED WEAPON	2	10	80%
BLUDGEONED	1	2	-50%
STRANGULATION	1	1	0%
VEHICLE	1	0	100%

RECAP

- The graph and table above show City of St. Louis homicide trends as they related to weapons used from 2014 and 2015.
- The vast majority of homicides were committed with a firearm.
- While 9 mm was the most popular caliber of firearm used in homicides for both years, it comprised only 23% in 2014 and 33% in 2015.

Gang Involvement: Homicide Victims and Suspects

RECAP

- Known gang involvement is low for both victims and suspects.
- Gang involvement ranged from 13-17% for suspects in this time period, and between 10-11% for victims.
- This graph ONLY represents those that have a known and documented gang affiliation, and does not include any informal or non-"gang" groups or crews, which have become more common in recent years.

Victimology: Age, Gender, Race/Ethnicity, & Toxicology

Race/Ethnicity of Homicide Victims

Victims were largely MALE, with 86% of victims over the previous two years being MALE.

Victims were also largely City residents with 74 and 71% from 2014 and 2015, respectively, being from the City.

As the tables show, victims were largely African-American as well.

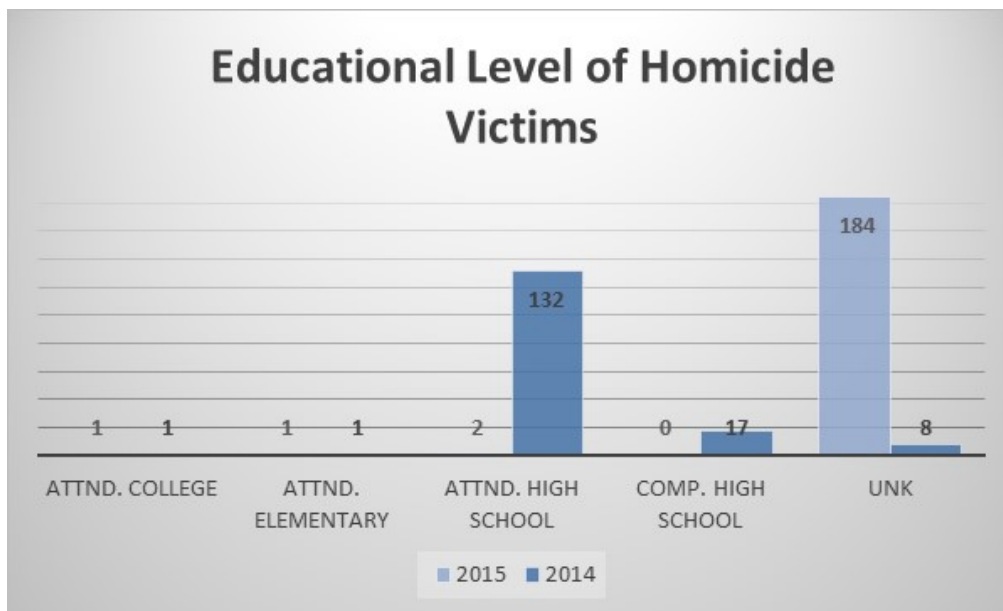

Average AGE varies widely. In 2012 it was 30, while in 2013 the average age was only 19, in 2014 it was 29, and in 2015 it was 30. Only five ages had 10 or more victims, though these are notably close together and show the true median age of homicide: 21(13), 22 (16), 23 (15), 24 (11), and 27 (11).

In 2014, 51% of victims were under the influence of some substance, while 50% were in 2015.

Toxicology of Homicide Victims

Suspectology: Age, Gender, Race/Ethnicity, & Criminal History

RECAP

- Over 90% of homicide victims in both 2014 and 2015 had a criminal history.

Suspectology: Age, Gender, Race/Ethnicity, & Criminal History

Race/Ethnicity of Homicide Suspects

Suspects were largely MALE, with 94% in 2014 and 97% in 2015 being MALE.

As the tables show, victims were largely African-American as well.

Average AGE doesn't vary as widely in Suspects as it does with Victims. In 2013, it was 31, while in 2014 & 2015 the average age was 28.

Toxicology cannot be determined on Suspects as most are not arrested at the time of the incident.

Suspect criminal history is fairly stable between years with 95% in 2014 and 97% in 2015 having a criminal history.

Criminal History of Homicide Suspects

Victim/Offender Relationship & Homicide Circumstances

RECAP

- The Graphs above show the relationship between victim and offender and the motive of the homicide, when known. Most are unknown as many are unsolved, and even when cleared, motives and relationships do not always present themselves clearly.

Explanation of Complaint Dispositions

Sustained: Investigation disclosed sufficient evidence to support the allegation of the complaint.

Not Sustained: Insufficient evidence available to either prove or disprove the allegation.

Unfounded: The complaint was not based on facts, as shown by the investigation, or the incident complained of did not occur.

Exonerated: The actions complained of did occur, but the investigation disclosed that the actions were reasonable.

Withdrawn: Complainant withdrew complaint and the investigation was terminated.

Mediation-Resolved: Both parties voluntarily resolved the complaint through confidential/constructive mediation.
